

Using Proudly New Zealand Made Products
YOUR ORGANIC SOLUTION TO A CLEAN GREEN ENVIRONMENT

23 March 2020

We at Bio-Zyme are sending information about the effectiveness of **Bio-Zyme Cleaner and Multipurpose as a Cleaner / Sanitiser for all surfaces.**

See Attached information from Ministry of Health NZ that has a very good explanation about cleaning and disinfection.

Bio-Zyme Cleaner and Multipurpose have been manufactured in New Zealand as a cleaner and have the following:

- **Accreditation from MPI as a Cleaner / Sanitiser**
- **Hills Laboratory tested as a broad spectrum bacteria control.** These test results are available on request

When cleaning with Bio-Zyme you are getting an excellent cleaning product and by using the same product to sanitise that is safe for the environment and the user.

When cleaning is performed 70% of the sanitising capabilities is taken up in the cleaning, hence why we do the 2 step clean/sanitise method (instructions are attached).

Or you can double the strength using 60 ml/litre for cleaning for peace of mind.

It is good idea at this time to be cleaning and sanitising more frequently (twice daily) especially door handles, taps, keyboards or any touch type surface etc. Spray Bio-Zyme onto a microfiber cloth, paper towel or dry wipe for this application. You can leave product to dry after sanitising at close of business or at home, or wipe off with clean cloth if people will be using door handles etc. while it is drying.

This product is organic with no solvents or caustic ingredients, it is proven to break down grease and remove organic material from the surface, which means surfaces are clean.

I hope this helps with explaining why and how our product can be used now and in the future. Please let us know if we can help you further.

Take care of yourself and your staff in this unpredictable time.

Regards
Bio-Zyme Team
